- Search - Video is recorded with date and time metadata and searched using same date and time format
- Metadata modification - Allows re-indexing of the video parts for easy search
- Authentication - MVlogger allows you to set up username and password to control the access to your video. It denies network access to visitors who do not have a valid username and password.
- Caption - You can also put timestamp or text string on top of your video with this caption feature.
- Multi frame rate - MVlogger allows you to set your desired frame rate to meet your needs. From 5 fps to 25/30 fps depending on your PAL/NTSC input.
- Multi resolution – You can choose video resolution fir recording i.e. 160X120, 180X144, 240X180, 320X240, 384X288 640X480, 720X576, 1280X720, 1920X1080
- Multi bit rate selection - 200 kbps, 250 kbps, 300 kbps, 400 kbps, 500 kbps, 600 kbps, 700 kbps, 800 kbps, 1 mbps 1.5 mbps and so on upto 15 mbps (custom bit rate can also be chosen)
- Auto Purge - allows you to auto purge videos after selected number of days based on FIFO method
- Video playback and extracting a clip - Playback is on the web browser itself and you can insert inpoint and outpoint to cut and save a clip
- API support for 3rd party applications

The screenshot displays the MV Logger web interface. At the top, there is a navigation bar with the logo 'MV Logger' and a 'Welcome, Mr. Admin Logout' message. Below the navigation bar, there are links for 'Search Video', 'Live Video', 'Add User', 'User Details', and 'Change Pwd'. The main content area is divided into two sections. On the left, there is a video player showing a woman in a pink scarf standing by a river. The video player includes a progress bar, a play/pause button, and speed control options (Low Speed, Normal Speed, High Speed). On the right, there is a metadata form with the following fields: Title (Song), Start Time (00:33), End Time (01:08), Location (kashmir), Keywords (salman), a text area for Description (ada), Metadata 1 (test), and Metadata 2 (test). An 'Add' button is located at the bottom of the form. Below the form, there is a section for 'Existing Metadata' which displays 'No Metadata Found!!'. The footer of the page contains the copyright notice '© 2015 Multivirt Technologies'.

Specs

Hardware Requirement

For upto 20 SD (384X288) Channels or 10 HD (840X480) channels

Core i7 – 10700, 24 GB RAM, Windows 10 Pro, 8 TB Video storage for SD @ 350 kbps or HD @700 kbps

For upto 50 SD (384X288) Channels or 25 HD (840X480) channels

Core i7 – 10700K, 32 GB RAM, NVidia Quadro RTX 4000 card Windows 10 Pro 16 TB Video storage in RAID 5 mode for SD @ 350 kbps or HD @700 kbps
